CLIENT BRIEF / DELIVERY COMPOSER

Financial Services AI Governance

REFERENCE SYN-FSI-002
SECTOR Financial services and insurance
CLASSIFICATION Synthetic demo data only

ENGAGEMENT REQUIREMENT

A financial services group needs a delivery team to move an AI-enabled claims workflow from pilot to controlled production. The engagement requires governed data, AI engineering, cloud transformation, security operations, and stakeholder governance across risk, compliance, and technology. Required roles are delivery leadership, data and AI engineering, and security consulting. Baseline clearance is sufficient and consultants must be available by 2026-09-14. Recommendations must use verified experience and preserve a human approval decision.

Evaluation instruction

Use recorded constraints before semantic relevance. Show the evidence for each proposed consultant and leave the final decision with a human delivery leader.
